

PHYSICS

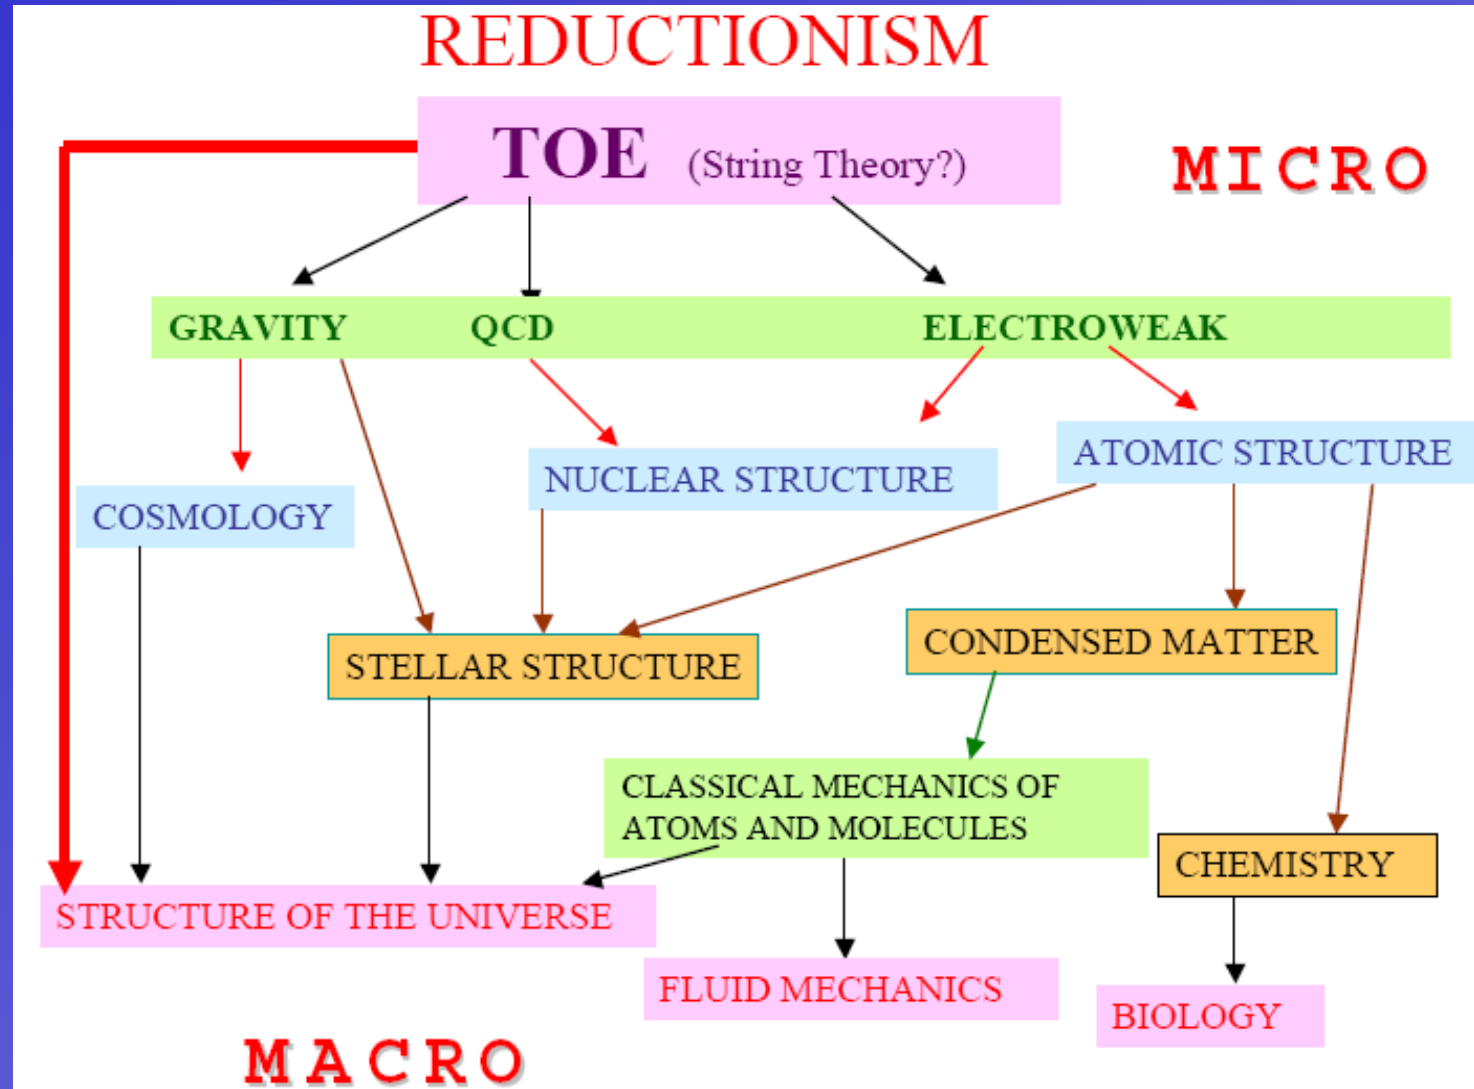

Reference book:

- 1 Physics : concepts and connections A.Hobson(
- 2 Physics and technology for future presidents Richard.A.muller (
- 3 The Feynman lectures on physics R.Feynman (
- 4
- 5 The artful universe J.Barrow
- 6 Linked: The new science of network A.L.Barabaci
- 7 Physics of the impossible Kaku Michio
- 8 How to teach physics to your dog C. Orzel
- 9 Time travel and warp drive A.Averret and T.Roman

What is Physics

Gold cube

Quark composition of a proton

Neutron

Gold nucleus

Proton

Nucleus

Gold atoms

How to find the truth of the physics?

1. Observe the Phenomena
2. Build the physical model
3. Calculation and predication
4. Experiment design and test

.....The other way draws axioms from the sense and particulars by climbing steadily and by degrees so that it reaches the ones of highest generality last of all; and this is the true but still untrodden way.

Francis Bacon (1561-1626)

Idols of the Tribe

tendency to perceive more order and regularity in systems than truly exists, and is due to people following their preconceived ideas about things.

Aaron James Ramsey (1990---)

Idols of the Cave

personal weaknesses in reasoning due to particular personalities, likes and dislikes.

Idols of the Marketplace

to confusions in the use of language and taking some words in science to have a different meaning than their common usage

Idols of the Theatre

This is the following of authorities and not asking questions about the world

David Hume (1711-1776)

Shall we rest contented with these two relations of contiguity and succession, as affording a complete idea of causation? By no means ... there is a *necessary connection* to be taken into consideration.

No matter how many instances of white swans we may have observed, this does not justify the conclusion that *all* swans are white.

Karl popper
(1902-1994)

Contents

1.Mechanics

2.Thermodynamics

3.Electricity and Magnetism

4.Optics

5.Modern Physics

Requirement

1. homework (15%):
2. Attendance 5%
3. Midterm (20%)
4. Final Exam(60%)

Measurement

SI (système international)

Unit in SI system

Mass (kilogram)

length (meter)

time (second)

current (Ampere)

Temperature (Kelvin)

Other system :

1 inch =2.54cm

1 pound=0.45kg

Scientific notation:

Order of magnitude:

Dimensions

$$1. t' = \frac{t - \frac{x}{c^2} u^2}{\sqrt{1 - \left(\frac{u}{c}\right)^2}} \quad 2. t' = \frac{t - \frac{x}{c} u}{\sqrt{1 - \left(\frac{u}{c}\right)^2}}$$

$$3. t' = \frac{t - \frac{1}{c^2} u^2}{\sqrt{1 - \left(\frac{u}{c}\right)^2}} \quad 4. t' = \frac{t - \frac{x}{c^2} u}{\sqrt{1 - \left(\frac{u}{c}\right)^2}}$$

Where u is the relative speed of two reference systems
 c is the speed of light, (x, t) and (x', t') are coordinates
observed within the two different reference system

Vector and Scalar

Addition and Subtraction of Vectors

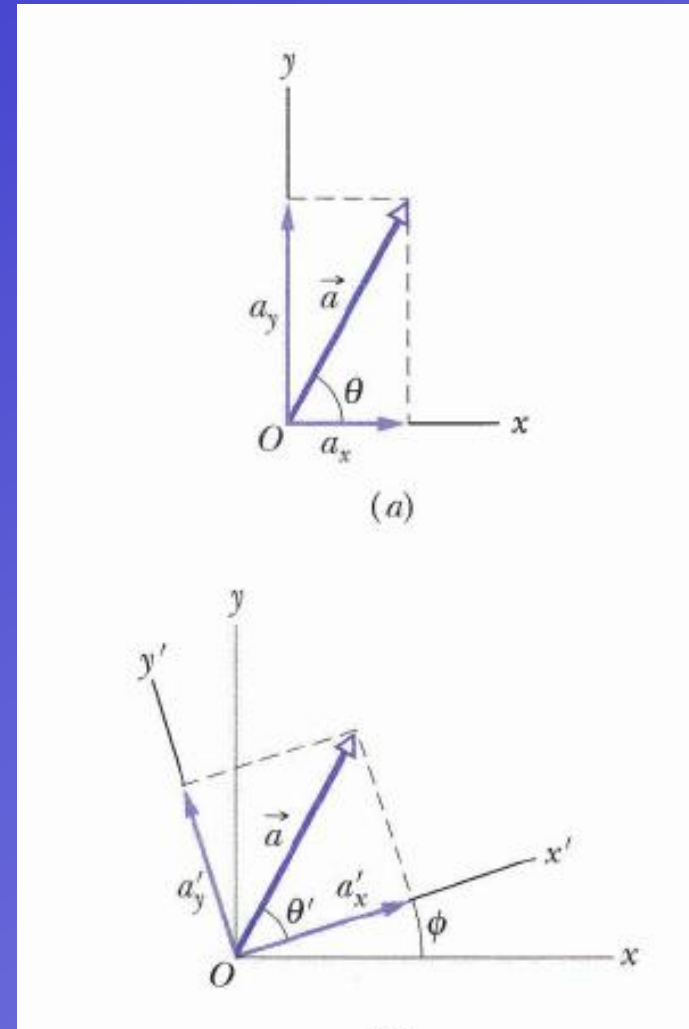

commutative law of addition

Subtract vectors

Component Vectors

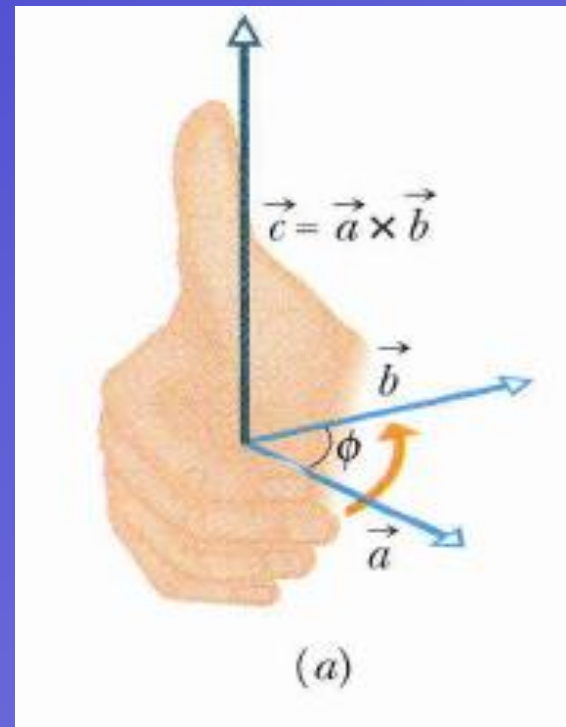

Production of two vectors

1. Scalar product

$$\vec{A} \cdot \vec{B} = |\vec{A}| \cdot |\vec{B}| \cos \theta$$

2. Vector product

$$|\vec{A} \times \vec{B}| = |\vec{A}| \cdot |\vec{B}| \sin \theta$$

Work : $dW = \vec{F} \cdot d\vec{s}$

Lorentz Force:

$$\vec{F} = q\vec{v} \times \vec{B}$$
